

Germ Shields

Durable, clear polycarbonate germ shields

Fast & Professional

About our Germ Shields

Fenco Germ Shields are built from 1/4" polycarbonate, ensuring superior durability compared to acrylic. Available in standard sizes like 24"x30" and 17"x30", each shield includes a pass-thru slot and two legs for easy countertop setup. Custom sizes are also available upon request. These shields offer a stable and temporary solution without the need for permanent fixtures, though additional stability can be achieved with tape. Cleaning is simple with soapy water and a microfiber cloth, avoiding ammonia-based products to maintain clarity.

Features

-  **Durable Construction**
-  **Multiple Models and Sizes**
-  **Easy Assembly**
-  **Stable Placement**
-  **Safe Cleaning**
